

**ADDENDUM 02**

**TO**

**REQUEST FOR PROPOSALS  
(RFP # HHSC 22-003)**

**COMPREHENSIVE RADIOLOGY SERVICES FOR THE WEST HAWAII REGION**

---

Addendum 02 to the RFP is issued to clarify Kona Community Hospital's requirement for "Interventional" radiology services.

The RFP Section 2, *Scope of Service*, Subsection 2.7.3 "On-Site Interventionist/Procedural Radiology Services at KCH", paragraph A states the requirement for one (1) board certified Interventionist/Procedural Radiologist and one (1) Mid-level Provider. Paragraph E lists required procedures that the Hospital defines as "Interventional". If the Offeror is able to provide these procedures through a Diagnostic Radiologist and not an Interventionist, the Offeror is encouraged to submit a Proposal describing this approach.

Kona Community Hospital does not have, nor is it seeking, a Vascular Interventional Radiology program, nor to expand the current set of procedures listed in Section 2.7.3. If Offeror is able to provide additional procedures then their Radiologists will be able to perform the full scope of privileges granted by Kona Community Hospital, which may include additional procedures.

Addendum 01 provided procedures by volume and payor mix data. No additional "Interventional" procedures were performed; the data provided is a full and complete accounting of procedures performed.
