

ACCELERATED REQUEST FOR PROPOSALS

RFP No. 26-0251 ADDENDUM 3

New Imaging Equipment

for

Hawaii Health Systems Corporation West Hawaii Region Kona Community Hospital and Kohala Hospital

Yvonne Taylor, Sr. Contracts Manager West Hawaii Region 79-1019 Haukapila Street Kealakekua, HI 96750 Telephone (808) 322-4442 Fax (808) 322-4488 http://www.kch.hhsc.org/

An Agency of the State of Hawaii

Addendum 3 hereby answers the Offerors' questions and provides new location for Fluoroscopy equipment (changes are highlighted in yellow):

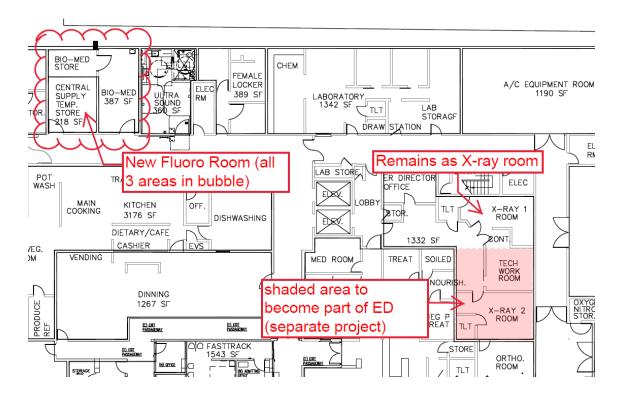

1. CLARIFYING QUESTIONS

1. We do not feel that we have had an answer to our question regarding line 8 on all three proposals, which references a one year manufacturer's warranty with a "5-year part & labor extended warranty, 6 year maintenance agreement that begins after completed installation included in purchase price"

Since a warranty is different than preventative maintenance, we want to be on a preventative maintenance scheduled from the day we accept the equipment (which should also be the start of the warranty). We want the warranty and the PMs to start and expire at the same time. 1 yr standard warranty + 5 year extended warranty = 6 years warranty. We also want 6 years preventative maintenance program to run concurrently with the warranty.

- 2. In the CT RFP in lines 139,140 and 141 this same reference has been crossed out.
 - In the RF RFP in lines 110, 111 and 112,the reference is crossed out.

 In the X-Ray quote it is still included in Lines 106,107 and 108. mistake should have been crossed out.
- 3. That existing space will be really tight to place a Fluoro room with a wall stand in. Are there options to switch the two rooms? See new location for Fluoro.

 Can I get clarification on which type of system you want quoted? I Remote system. Nearby/bedside. 	Nearby or
2. Requirements Table	
Requirements Table has been corrected.	
RFP 26-0251 ADDENDUM 3 New Imaging Equipment 11-20-25 FINAL

Appendix E CT Requirements Table Must be filled out completely

	A	В	С	D
205	What is your definition of uptime and how do you calculate it?			
	What replacement parts are stored on Oahu?			
	What replacement parts are stored on the Big Island?			
	Where are the tubes stored?			
209	What marketing tools are available from your company?			
	Final questions:			
	What is the closest location the proposed equipment is installed should			
	we choose to perform a site-visit?			
	Why should you be awarded the contract for our new CT?		•	
213	Any additional Information you would like us to know?		<u>. </u>	

	A	В	С
1			
2	Vendor Name:		
3			
4	Fluoroscopic System Model Name/Number:		
5			
6	Mandatory Requirements *		
	· · ·	M	eet
7	*Proposal will be disqualified if all Mandatory Requirements are not met.	(insert YES	or NO in cell)
	1 year manufacturer warranty, 5 year part & labor extended warranty, 6		
	year (warranty + ext warranty) maintenance agreement that begins after		
	completed installation included in purchase price (shown as a separate		
8	line item)		
9	Small footprint		
	System to include at a minimum: table, Bucky and grid system, digital		
	detector, x-ray generator, x-ray tube and suspension system and		
10	collinator.		
	High patient weight limit (minimum 600lbs). State your equipment's		
11	weight limit.		
	Bedside and remote operation		
13	TIMS for Video swallow studies		
14	Stirrups or another solution for Hysterosalpingograms		
15	DSA capability		
	Stitching capability		
	MAR (Metal Artifact Reduction) deleted		
	Table height can be adjusted to facilitate patient transfer from a mobile		
18	stretcher or wheelchair.		
	Most current in production, up-to-date model, first rate quality. All		
	applicable options and software must be most current, up-to-date for the		
	proposed model.		
	New, not refurbished or reconditioned		
	Optical disk drive or equivalent for archival storage-optional		
	Radiation reduction		
23	Remote diagnotics		
	Software for data acquisition, image reconstruction, image enhancement		
24	and image manipulation and image analysis		
_	Software for image reconstruction in other planes (sagittal, coronal,		
	parasagittal, paracoronal)		
	Software for scan image enlargement (prospective zoom)		
27	high patient weight limit (minimum 600lbs)		

	А	В	С
28	Stent evaluation		
	X-ray generator		
30	X-ray tube and housing assembly		
	General:	Meet / Exceed (insert word in cell)	Does Not Meet (insert words in cell)
	What is the system's boot up time from a cold boot?		
33	Does the system have a sleep mode? If yes, what is the boot up time from the sleep mode?		
	What is the preview (exposure to view) time?		
	With what methods can the sytem be turned on?		
36	What is the overall footprint of the system (length, width and height with mast/boom fully retracted)?		
37	Where is the system manufactured (list components seperately if necessary)?		
	Does the system have any storage (gloves, markers, papers, etc.)?		
	Date of FDA approval?		
	Describe your marketing support for community outreach.		
	Where is your account rep located?		
	Where are your service techs located?		
	What exams can your systems NOT perform?		
	Provide 3-5 reasons your recommended system is stronger than your competitors.		
	Equipment/Computer hardware:	Meet / Exceed (insert word in cell)	Does Not Meet (insert words in cell)
46	- computer processor(s)		
47	- data acquisition		
48	- detectors		
49	- disk drives		
50	- independent workstation, can be located up to 100m from the xray		
51	- input/output units		
52	- operator's console, ergonomically designed, 2 monitors, truly multitasking with separate data basis for each		
53			

	A	В	С
54	Table:	Meet / Exceed (insert word in cell)	Does Not Meet (insert words in cell)
	Electromagnetic locking system		Cell)
	Electro-mechanical float top that moves in 4 directions		
- 30	Electro-mechanical float top that tilts and moves in minimum of 6		
57	directions		
	High-frequency generator (no high-voltage cables)		
	Pedestal floor mount		
	table top hand control		
	Table height can be adjusted to facilitate patient transfer from a mobile stretcher or wheelchair.		
62			
63	Delivery/Transporation Requirements	Meet / Exceed (insert word in cell)	Does Not Meet (insert words in cell)
	Actual ship date from factory and container sail date must be		,
64	communicated to KCH in a timely manner.		
	Equipment to be delivered on mutually acceptable date and time.		
	Equipment to remain in manufacturer's packaging from factory to KCH.		
	Freight charges to be included in pricing.		
69	Rigging & coordination to be communicated with KCH.		
09			Doos Not
70	Installation Requirements	Meet / Exceed (insert word in cell)	Does Not Meet (insert words in cell)
	All materials used will be new and of first-rate quality		
	All necessary trades will be provided and their costs included.		
	Equipment test protocol will be provided prior to installation		
74	Installation company will pull all applicable permits		
75	Interface with IT, Imaging department, RIS/PACs (Fuji) and Radiologist connections at no additional cost		
76	Must be fully insured to cover installation (at minimum, worker's comp, contractor's liability, property damage)		
	Provide all State and Federal regulatory documentation		
	Provide installation and pre-staging test results		

	Α	В	С
	Within 30 days after award, provide drawing detailing all construction,		
79	electric and other work to be performed by vendor.		
80	Wall penetrations (if any) will be done with UL fire stopping materials		
	Specify room requirements and site readiness to support the system.		
81	Drawings may be place immediately behind this table.		
	Work to be performed by bona-fide employees or authorized/certified		
82	distributor		
83	Preventative Maintenance	Meet / Exceed (insert word in cell)	Does Not Meet (insert words in cell)
84	Work to be performed in off-peak hours (11pm - 5am HST)		,
	Document detailing work performed to be provided to KCH within 14		
85	days of service.		
86	•		
87	Training Requirements - Two Phase	Meet / Exceed (insert word in cell)	Does Not Meet (insert words in cell)
	Additional, optional training available if requested		55)
	American College of Cardiology (ACC) accredited		
	American Heart Associateion (AHA) accredited		
	ASRT accredited		
<u> </u>	Online training modules available to WHR techs throughout life of		
92	agreement at no additional charge.		
	On-site (KCH) training is required at no additional cost. Training will be		
	for 3-4 techs. Due to staffing requirements, off-site training is not		
	feasible for KCH.		
94			
95	Phase one:	Meet / Exceed (insert word in cell)	Does Not Meet (insert words in cell)
96	Minimum 40 hours, on-site at KCH for both technologists and physicians		
97			

	A	В	С
98	Phase two:	Meet / Exceed (insert word in cell)	Does Not / Can Not Meet
99	Minimum 72 hours, on-site at KCH for both technologists and physicians within one year of installation		
100			
101	Warranty Requirements	Meet / Exceed (insert word in cell)	Does Not Meet (insert words in cell)
	Any part that is replaced during the warranty period will have its own full warranty that begins at equipment's acceptance date		33.1)
103	Guarantee availability of repair parts for minimum of 10 years after final equipment acceptance.		
	Min. response time of 1/2 hr via telephone, and onsite within 2 hrs if unit is down per telephone call. 4 hour on site response time if unit is still		
104	operational		
105	Provide new replacement of any defective part that requires repair more than twice during the warranty period		
106	Provide scheduled inspections and preventative maintenance		
107	Replace or repair any/all defective equipment and/or software at no cost to KCH (parts and labor), M-F, 8am - 10pm HST		
108	System warranty will be extended for one month after each subsequent replacement		
109	Tubes to be covered under warranty (parts and labor)		
110	One (1) year minimum full manufacturer's warranty (parts & labor) included in purchase price.		
111	Five (5) year extended warranty (parts & labor) included in purchase price - show as separate line item on proposal		
	Six (6) year full service maintenance agreement included in purchase price - show as a separate line item on proposal. If preventative		
	maintenance is included in the first year, state as such.		
113			
114	Support Requirements	Meet / Exceed (insert word in cell)	Does not Meet (insert word in cell)
<u> </u>	11 7	,	12.2.1.0011)

	A	В	С
	MONTHLY uptime quarantee of 98%. If uptime is not met, what		
115	compensation will be provided to KCH or KOH?		
	Service technican to be located in the state of Hawaii throughout the life		
	of the Agreement.		
117	No separate licensing fee for use of software		
	Provide 1 set complete replacement parts list upon acceptance - hard		
118	copy + electronic		
	Provide 1 set of diagnostic software, manuals and phantoms upon		
119	acceptance - hard copy + electronic		
	Provide 2 sets of Maintenance & Service Manuals upon acceptance -		
120	hard copies + electronic		
	Complete Control Manager Land		
404	Supply 2 sets of Operator Manuals upon acceptance- hard copies +		
121	electronic		
	Provide updates to KCH when any applicable change to the manuals are		
122	made. Updates to be provided within 30 days of change.		
	Remote diagnostics at no charge		
	First and Second Support Years		
	Applications support		
	Documentation		
	In service training		
	Repair and replacement of defective equipment		
	Scheduled inspection/preventative maintenance		
	Software upgrades (see below details)		
131	Continuito apgrades (See below details)		1
	Hardware/software updating		
102	All upgrades and any associated hardware to support them shall be		
133	brought to KCH's attention within 30 days of their release		
100	Any upgrades or enhancements that add new capabilities to the system		
	supplied will be available to HHSC for a minimum discount of 70% for 5		
134	years.		
134	No charge software upgrade, including parts, if enhancing existing		
135	capabilities		
	No charge software upgrade, not including parts, if adding new		
136	capabilities		
100			

	A	В	С
	No charge upgrades to make the digital x-ray unit comply with changing		
	safety standards and regulations		
138	General Questions		
	Describe your proposed system's features and capabilities, including		
139	dose reduction.		
	During what timeframe (Hawaii Standard Time) will software upgrades		
	be conducted?		
141	How does humity effect the system?		
142	What RH value does the room need?		
143	How will software upgrades be provided?		
	Is there a separate licensing fee for use of your software? If yes, what is		
	the fee and how often is it payable? Include in proposal as a separate		
144	line item.		
145	List the system's scanning techniques available as standard options		
	State your proposed system's DICOM functionality and provide the		
146	DICOM conformance statement.		
	What discount will be given for any/all parts needed after warranty period		
147	expires?		
	What discount will upgrades and/or enhancements that add new		
	capabilities or parameters to this equipment be extended and for how		
	long?		
	What downtime is needed for scheduled preventative mantainance?		
	What is the expected life-span of the quoted equipment?		
	What is the lead time from receipt of p.o. of your quoted system?		
	What is the system's cooling system requirements (BTU/hr)?		
	What is the system's electrical requirements (V & kVA)?		
154	What is the system's power consumption (kW)?		
	What other environmental requirements does the system have		
155	(humidity, etc.)?		
	What upgrades does your company anticipate coming to market in the		
	next 3 - 5 years?		
	Stitching		
158	What does your proposed package encompass?		
	Orthopedic Imaging		
160	Include all software and hardware to perform orthopedic imaging		
161	Miscellaneous		

A	В	С
For replacement parts that are not stored in Oahu, where are they stored and how long will they take to reach KCH? Is this guaranteed?		
How many systems, same as you are proposing, have been installed in Hawaii for calendar year 2024 and 2025, up to the date of RFP release?		

	A	В	С
	How many systems, same as you are proposing, have been installed in		
	the U.S. for calendar years 2024 and 2025, up to the date of RFP		
164	release?		
165	What holidays and other observances will be charged at overtime rate?		
	What is the anticipated downtime timeframe for installation? Is this		
166	guaranteed?		
167	What is your definition of uptime and how do you calculate it?		
168	If agreed upon uptime is not met, what compensation will you provide?		
169	What replacement parts are stored on Oahu?		
170	What replacement parts are stored on the Big Island?		
171	What do you plan to do with our existing equipment?		
172	Final questions:		
	What is the closest location the proposed equipment is installed should		
173	we choose to perform a site-visit?		
	Why should you be awarded the contract for our new fluoroscopic		
174	system?

	MONTHLY uptime quarantee of 98%. If uptime is not met, what			
111	compensation will be provided to KCH or KOH?			
1,40	Service technican to be located in the state of Hawaii throughout the life			
	of the Agreement.			
113	No separate licensing fee for use of software			
1,,,	Provide 1 set complete replacement parts list upon acceptance - hard			
114	copy + electronic			
	Provide 1 set of diagnostic software, manuals and phantoms upon			
115	acceptance - hard copy + electronic			
	Provide 2 sets of Maintenance & Service Manuals upon acceptance -			
116	hard copies + electronic			
	Supply 2 sets of Operator Manuals upon acceptance- hard copies +			
117	electronic			
	Provide updates to KCH when any applicable change to the manuals are			
118	made. Updates to be provided within 30 days of change.			
	Remote diagnostics at no charge			
	First and Second Support Years			
	Applications support			
	Documentation			
	In service training			
	Repair and replacement of defective equipment			
	Scheduled inspection/preventative maintenance			
	Software upgrades (see below details)			
127				
128	Hardware/software updating			
1	All upgrades and any associated hardware to support them shall be			
129	brought to KCH's attention within 30 days of their release			

	A	В	С	D
	Any upgrades or enhancements that add new capabilities to the system			
	supplied will be available to HHSC for a minimum discount of 70% for 5			
130	years.			
	No charge software upgrade, including parts, if enhancing existing			
131	capabilities			
	No charge software upgrade, not including parts, if adding new			
132	capabilities			
	No charge upgrades to make the digital x-ray unit comply with changing			
133	safety standards and regulations			
134	General Questions			Expanded Answer
	Describe your proposed system's features and capabilities, including			
135	dose reduction.			
	During what timeframe (Hawaii Standard Time) will software upgrades			
136	be conducted?			
137	How does humity effect the system?			
138	How will software upgrades be provided?			
	Is there a separate licensing fee for use of your software? If yes, what is			
	the fee and how often is it payable? Include in proposal as a separate			
139	line item.			
140	List the system's scanning techniques available as standard options			
	State your proposed system's DICOM functionality and provide the			
141	DICOM conformance statement.			
	What discount will be given for any/all parts needed after warranty period			
142	expires?			
	What discount will upgrades and/or enhancements that add new			
	capabilities or parameters to this equipment be extended and for how			
	long?			
	What downtime is needed for scheduled preventative mantainance?			
	What is the expected life-span of the quoted equipment?			
	What is the lead time from receipt of p.o. of your quoted system?			
	What is the system's cooling system requirements (BTU/hr)?			
	What is the system's electrical requirements (V & kVA)?			
149	What is the system's power consumption (kW)?			
	What other environmental requirements does the system have			
	(humidity, etc.)?			
151	What RH value does the room need?			

Appendix E XRay Requirements Table Must be filled out completely

	A	В	С	D
	What upgrades does your company anticipate coming to market in the			5
152	next 3 - 5 years?			
	Stitching			
	What does your proposed package encompass?			
	Orthopedic Imaging			
	Include all software and hardware to perform orthopedic imaging			
	Miscellaneous			
158	For replacement parts that are not stored in Oahu, where are they stored and how long will they take to reach KCH? Is this guaranteed?			
159	How many systems, same as you are proposing, have been installed in Hawaii for calendar year 2024 and 2025, up to the date of RFP release?			
160	How many systems, same as you are proposing, have been installed in the U.S. for calendar years 2024 and 2025, up to the date of RFP release?			
161	What holidays and other observances will be charged at overtime rate?			
162	What is the anticipated downtime timeframe for installation? Is this guaranteed?			
163	What is your definition of uptime and how do you calculate it?			
164	What replacement parts are stored on Oahu?			
	What replacement parts are stored on the Big Island?			
166	Where are the tubes stored?			
167	What do you plan to do with our existing equipment that we trade in?			
168	Final questions:			
	What is the closest location the proposed equipment is installed should we choose to perform a site-visit?			
	Why should you be awarded the contract for our new digital x-ray unit?			
171	Any additional Information you would like us to know?
